

Terrace Art Gallery

& GIFT SHOP

www.terraceartgallery.com 250-638-8884

At the Terrace Art Gallery, we are committed to supporting and representing our artist members. In turn, we expect our artists to act with integrity and honesty in their dealings with the gallery and in our community.

At this time, AI Generated* pieces are not eligible for shows, sales, or display within Terrace Art Gallery programming. This is to protect the reputation of the Gallery and all of the artists we represent; along with other concerns of copyright, environmental damage, and cultural appropriation. We place priority for human artists who are completely hand creating their works.

By signing, you (the artist) agree that your artwork submission is free from AI Generative content.

Any concerns and questions of this policy may be discussed with the curatorial committee and/or the board.

**AI generated content is any content that is generated by an artificial intelligence system via prompts. Examples of such systems include, but are not limited to ChatGPT, Sora, Grok, Anthropic, and OpenAI. This does not include using digital art programs for editing and hand illustration, such as Adobe, Procreate, DaVinci, etc. where it requires significant time, skill, hand-eye coordination and is guided by the artist.*
